

Macro Reference Guide

Zen Foundation contains a variety of macros to assist with menu and navigation setup, content layout, and dynamic content. The Confluence editor's macro wizard provides usage hints for each macro while you're adding wiki content.

To help find the macro that's right for your situation, here are Zen's macros organized by category.

Macros for Menus and Navigation

- [Blog Link](#)
- [Cross Space Link](#)
- [New Window](#)
- [Page Tree](#)
- [Page Turners](#)
- [Restrict Based on Permissions](#)
- [Same Window](#)
- [Simple Children](#)

Macros for Summarizing Content

- [Attachments List](#)
- [Page Tree](#)
- [RSS Feed Link](#)
- [Simple Children](#)

Macros for Design

- [Active Image](#)
- [Add Class](#)
- [Body Class](#)
- [Clear](#)
- [Dynamic Image Map and Hot Spots](#)
- [Full Width](#)
- [Random Content](#)
- [Rotate Images](#)
- [Wrap](#)

Macros for Dense Content Presentation

- [Disappear and Reveal Macros](#)

Macros for Search Engine Optimization

For public-facing Confluence wikis, Zen contains several tools for enhancing search engine indexing of your content.

For example, the [active-image](#) macro includes an *accessible* parameter that allows you to tag your image with header text, to assist search-engine indexing.

In addition, Zen contains the following SEO-specific macros:

- [SEO Meta Description](#)
- [SEO Title](#)

Miscellaneous

- [Comment](#)
- [Twitter Feed](#)
