

Zen Installs

Check Your Version

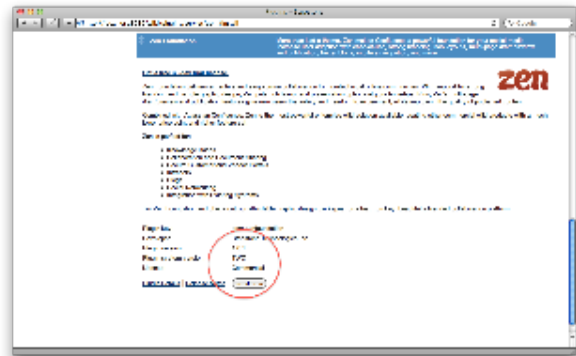

Before installing Zen, please [determine which version of Zen you want](#).

Then install it using the Universal Plugin Manager (UPM) or manually:

Universal Plugin Manager

The easiest way to install Zen is via the Universal Plugin Manager.

1. On the *Admin Console > Plugins* page, select the *Install* tab
2. In the *Featured* list, scroll down and select Zen Foundation
3. Confirm that the Zen version shown is the correct one, and then click **Install Now**

- If you want a [different version of Zen](#), please download it and use the directions for

[Manual Installation](#)

Manual Installation

If the version you need isn't available in the Universal Plugin Manager, you can download the Zen Foundation jar and use the Plugin Manager to install it.

1. On the *Admin Console > Plugins* page, select the *Install* tab
2. Click the *Upload Plugin* link and use the wizard to choose your downloaded file and then click **Upload**
